Dry Eye Syndrome Symptoms Checklist

Patient Name: _____ Date: _____

Please check any of the following symptoms that you have experienced recently:

- Dryness of the eye
- Redness
- Itching
- Watery eyes
- Tired eyes
- Burning
- Mucous /discharge
- Eye pain or soreness
- Sandy or gritty feeling
- Light sensitivity
- Sties
- Lid infections
- Constant or occasional tearing
- Frequent use of lubricating eye drops
- Contact lens discomfort
- Contact lens solution sensitivity

If you are experiencing any of the above symptoms, you may have dry eyes. There are many new treatment options available that are far superior to older methods. Our doctors will be able to determine which treatment is best for you.

Call today to schedule an appointment for a dry eye evaluation.
